It is important for your safety and enjoyment that you are aware of the weights and tow ratings of the RV you select. Consult a competent advisor for questions or advice. Whether you are new to RVing or a veteran, get a feel for the performance of your RV before heading out on the roadways. When you tow a vehicle with your RV, you must drive differently than when you drive a single vehicle. Practice hooking up, driving, backing up and braking in a safe environment or seek out professional instruction. Jayco affixes a weight label to each RV which lists weight information for that vehicle. Refer to that label to verify the vehicle will meet your requirements. Gross Vehicle Weight Rating (GVWR): The maximum permissible weight of the motorhome, including the Unloaded Vehicle Weight (UVW) plus passengers, personal items, all cargo, fluids, options and dealer-installed accessories. The GVWR is equal to or greater than the sum of the UVW and the Cargo Carrying Capacity. Gross Combined Weight Rating (GCWR): The maximum allowable combined weight of the motorhome used as a tow vehicle and the attached towed vehicle.
